Senior Manager, PDX Airside & GA Airport Operations
Portland International Airport

RE: Approval of Part 139 SMS Implementation Plan for Portland International Airport.

Dear Ms. Simonds:

The Federal Aviation Administration (FAA) has approved the Implementation Plan submitted by Portland International Airport (PDX). This plan is to be used to comply with 14 CFR § 139.403. The plan identified that a gap analysis and report were completed, however, identification of specific gaps that could present challenges in meeting Part 139 requirements were not clearly defined. The analysis should identify existing processes that satisfy requirements, areas requiring improvement, and/or processes that require development. Updates to the approved plan timelines or elements will be submitted to the FAA, however, will not require further FAA approval providing the requirements as defined in 14 CFR parts §139.402 and §139.403 continue to be met.

In accordance with the requirements as defined in part 139.403(c)-(d), you must submit your SMS manual within 12 months from the date of this approval letter. In addition, you must fully implement your SMS as identified in your implementation plan, no later than 36 months from the date of this letter.

Please contact me if you have any questions.

Sincerely,

Rick Schoder
Lead Airport Certification Safety Inspector
FAA Northwest Mountain Region, Airports Division
